

Anna Beth Pruitt, MMSc, PA-C

Curriculum Vitae

EXPERIENCE

Physician Assistant | Athens Neurological Associates **July 2018 – Current**
Neurology provider in a fast-paced, outpatient clinic setting. Job duties include evaluating and treating patients of all socioeconomic statuses and stages of life who have neurologic complaints in a clinical setting. Involved in all aspects of patient care including taking a detailed history, physical examinations, development and implementation of treatment plans, prescription of medications, ordering and interpreting labs and diagnostic imaging tests and procedures.

Physician Assistant | Cornerstone Orthopaedics and Sports Medicine **July 2016 – June 2018**
Orthopedic provider in a fast-paced, rural clinic. Job duties include evaluating and treating patients of all socioeconomic statuses and stages of life who have orthopedic complaints in a clinical setting. Involved in all aspects of patient care including taking a detailed history, physical examinations, development and implementation of treatment plans, prescription of medications, ordering and interpreting labs and diagnostic imaging tests. For over a year, I served as the sole clinical provider during afternoons and several weekdays.

Skills practiced in the clinical setting include, but are not limited to casting, splinting, joint aspirations and injections, trigger point injections and closed reductions in an office setting.

American Academy of Physician Assistants (AAPA)
Georgia Association of Physician Assistants (GAPA)

HEALTHCARE / VOLUNTEER EXPERIENCE

Physician Assistant Student Volunteer

June - August 2015

I worked as a part of a multidisciplinary team of students, professors and practicing physicians and physician assistants to provide low-cost or free medical screenings and focused physical exams to the medically underserved population. Health care consisted of focused and comprehensive physical exams, education on preventative measures, performing minor procedures, hosting after-hour clinics and the administration of medications and treatments based on individual assessments.

South Georgia Migrant Farm Worker Health Project

July 2015

I worked as a part of a multidisciplinary team of students, professors and practicing physicians and physician assistants to provide free medical screenings and focused physical exams to underserved migrant farm workers. Health care consisted of focused and comprehensive physical exams, education on preventative measures, performing minor procedures, hosting pediatric clinics and the administration of medications based on individual assessments.

Hispanic Health Fair

October 2014

I worked as a part of a multidisciplinary team of students, professors and practicing physicians and physician assistants to provide free healthcare to the underserved Hispanic population. I mainly worked in the Pediatric clinic to administer annual influenza vaccinations to children and adults alike. Other tasks included the performance of focused and comprehensive physical exams, diabetic education and counseling while also triaging patients to be seen.
